#### WHERE IT GOES

This part in colour, its neighbours in grey

#### HOW TO MAKE IT AND HOW IT FITS

Cut 104 x 62 mm from 2 mm sheet; deburr.

Four 3.4 mm holes for the floor pads: 8 and 96 mm from the rear edge, 24 mm each side of the centre line.

Four 2.7 mm holes for the Pi spacers, on the Pi 4's 58 x 49 mm pattern: 9.5 and 67.5 mm from the rear edge, 24.5 mm each side.

Also cut the deck: 68 x 56 mm, 2 mm sheet or a printed plate, with the same Pi pattern 3.5 mm in from its rear and side edges.

Fit: four M3 x 6 screws into the floor pads; the Pi sits on 4 mm spacers; the deck on 20 mm M2.5 standoffs above the Pi.

A thermal pad between the Pi's heat sink and the deck or tray gives the heat path to the hull.

Check: the tray drops in past the rim (64 mm opening) without force.
