WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Print flat, 56 wide x 48 tall x 4 mm.
Centre hole 16 mm for the lens barrel.
Four 3.4 mm holes on a 40 x 40 mm square, centred on the lens hole,
for M3 screws into the front wall.
Four M2 holes on a 20 x 20 mm square for the camera board standoffs
(move them to suit the board you buy).
Fit: flat on the inside of the front wall, lens hole on the camera
axis 62 mm above the track contact line.
The lens's optical centre must sit on the dome centre (the hull's
front face): set it with the lens thread, then lock it.
Check: the lens barrel passes the bore without touching it.
