WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Cut 9 mm off 30 x 30 x 3 mm angle (the angle's length is the bracket's height); deburr.

Back leg (on the ballast nose): two 4.5 mm holes, 4.5 mm up, 9 and 19 mm from the corner.

Forward leg (carries the fin): two 3.2 mm holes, 4.5 mm up, 20 and 26 mm forward of the back face.

Fit: back leg flat on the ballast nose, corner on the centre line, back leg to the crawler's left; two M4 x 10 screws into the nose.

The forward leg stands just right of the centre line; the fin bolts to its left face. The bracket top is 1 mm below the bezel.

Check: the forward leg is square to the ballast nose.
