WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Cut 132 mm of 25 x 6 mm flat bar; deburr.

6.4 mm hole 10 mm from the bottom end, on the centre line (the front foot tie rod goes through it).

Two 5.5 mm holes for the counter, 97 and 122 mm from the bottom end.

Fit: stands upright between the two halves of the front spacer tube; the tie rod clamps it. The counter bolts to its front face.

Check: the bar stands square to the base of the frames.
